

Sapling Dual-Faced Clocks

Sapling is constantly innovating ways for our clocks to be seen by the public. We provide dual-faced clock options that make seeing the time easier for everyone. Dual-faced clocks are perfect for hallway applications and large areas. Using dual-faced clocks allows people to view the time from both directions. All of Sapling dual-faced clocks can be mounted from either the ceiling or the wall.

Double Mount Housing for Sapling Round Analog Clocks

If your application requires a dual-faced round analog clock, you will need to order two single (surface) mount clocks and one double mount housing. Both clocks easily attach to the double mount housing. Detailed information of how to mount the unit to the wall or ceiling and run wires to the clocks must be reviewed in the clock manual under the "Double Mount Installation" section for proper setup and assembly. This double mount housing is available for the round 12" and 16" analog clocks.

Pole for Sapling Dual-Faced Square Analog Clocks

If your application requires a dual-faced analog square clock, you will need to order two single (surface) mount clocks and one pole. Since the square clock housing is made with a back plate and a front plate, you can detach the back plate and screw it to the pole. Once secured on the pole you can now snap on the front plate of the clock. Because of this, all you need to order for a dual-faced square clock (besides the two clocks) is the pole. Detailed information of how to mount the unit to the wall or ceiling and run wires to the clocks must be reviewed in the clock manual under the "Double Mount Installation" section for proper setup and assembly. This pole is available for the square 9" and 12" clocks.

Ordering Information:

Double Mount Pole: SAB-XXD-XXS-0

Material:	Color:	Pole Size:
1: Metal →	B: Black →	00: Standard
OR		
4: ABS →	G: Gray →	01: Short (ceiling only)

Pole for Sapling Dual-Faced Standard Size Digital Clocks

If your application requires dual-faced standard size digital clocks (2.5" or 4.0"), you will need to order two single (surface) mount clocks and one pole. Since the digital clock housing is made with a back plate and a front plate, you can detach the back plate and screw it to the pole. Once secured on the pole you can now screw on the front plate of the clock. Because of this, all you need to order for a dual-faced digital clock (besides the two clocks) is the pole. Detailed information on how to mount the unit to the wall or ceiling and run wires to the clocks must be reviewed in the clock manual under the "Double Mount Installation" section for proper setup and assembly. The pole is available for the 2.5" and 4.0" digital clocks.

Pole(s) for Sapling Dual-Faced Large Digital Clocks

If your application requires dual-faced large digital clocks (6.0", 9.0", or 12.0"), you will need to order two clocks and the mounting pole(s). Dual-faced digital clocks with 6.0" or 9.0" digits utilize one double mount pole, while digital clocks with 12.0" digits use two poles for double mounting. The double mount pole part number for 12.0" digital clocks includes two poles as standard. To make a dual-faced clock, you will secure the large digital clock to the mounting bracket(s) on the double mount pole(s). Detailed information on how to mount the unit to the ceiling or wall and run wires to the clocks must be received in the clock manual under the "Double and Flag Mount Installation" section for proper setup and assembly. Since dual-faced large digital clocks require a specific pole (or poles) depending on the size of the clock and whether the pole(s) will be mounted to the ceiling or the wall, please review the ordering information carefully.

Ordering Information:

SLD-1DM-XXXX-XX

To summarize, for dual-faced clock viewing, you will need to order two single mount round clocks and one double mount housing for the round analog clock applications. When using square analog clocks or digital clocks all you need to order is two single mount clocks and one double mount pole. All Dual Face Mounting Housings / Poles will allow you to mount the clocks either from the wall or from the ceiling. Detailed information can be found in each of our clocks manuals. This must be reviewed before installing the clocks.

If you have any additional questions please contact your dedicated Sapling representative.
