

Sapling Dual-Faced Clocks

Dual-faced clocks are commonly used in high-traffic areas and/or in facilities' hallways. They can be mounted from either the ceiling or the wall, allowing people to view the time from both directions.

Dual-Faced Clock Mounting Brackets

Clocks are offered at different sizes, shapes, and types (analog or digital), and therefore will have different types of mounting brackets. This brochure will provide information about the different options and ordering information.

Detailed installation instructions on how to mount the unit to the wall or ceiling are explained in the clock's manual.

Double Mount Housing for Sapling Round Analog Clocks

A dual-faced **round analog clock** configuration will consist of one (1) double mount housing and two (2) round analog clocks. Two types of double mount housing are available, depending on the round clock case. This double mount housing is available for the round 12" and 16" analog clocks.

Ordering Information:

For Double Mount Housing for clocks with SlimLine and Brushed Aluminum cases:

SAH-1BD-XXR-0

Clock Size:
12: 12"
16: 16"

Mounting Pole for Sapling Dual-Faced Standard Size Digital Clocks or Square Analog Clocks

A dual-faced **standard size digital clock** or **square analog clock** configuration will consist of one (1) pole and two (2) clocks. The mounting pole is available for the 2.5" or 4.0" digital clocks and the square 9" or 12" analog clocks. The mounting pole is offered at either standard height or short height. The standard pole height allows ceiling or wall mounted dual or flag mounted configuration, while the short pole height is meant for ceiling mounting only and used at locations with low ceiling clearance.

Ordering Information:

For Double Mount Pole for Digital or Square Clocks:
SAB-1BD-XXS-0

Pole Size:

00: Standard height

01: Short height (ceiling mount only)
