Synchronized Clock Systems

Sapling's Flag Mount Housing

Sapling offers a Flag Mount Housing option which mounts one clock to either the wall or ceiling in order to accommodate various types of facilities and their infrastructure. This mounting option can house Sapling's digital clock, as well as the round or square analog clock and involves a simple installation process.

Applications

The Flag Mount Housing option is typically used in facilities that accommodate large amounts of people who are on the move. More specifically, the Flag Mount Housing option is ideal for hallway applications, including airports, transportation facilities and convention centers.

Other applications of Sapling's Flag Mount Housing are the three-way facing ceiling mount clocks and the four-way facing ceiling mount clocks. With the three-way and four-way facing clock options, this allows for three or four clocks to be mounted to the ceiling for maximum visibility of the time for your patrons, no matter what angle they are viewing the clocks.

Ordering Information

Standard Size Digital Clocks

Sapling's standard size digital clocks (2.5" or 4.0" digits) use the Mounting Pole with the Flag Mount Housing option. The part number for the Mounting Pole to use in conjunction with the digital clock is as follows:

- Sapling Flag Mount Pole, Standard length: SAB-1BD-00S-0
- Sapling Flag Mount Pole, Short length: SAB-1GD-01S-0

Square Analog Clock

The 9" or 12" square analog clock also requires the Mounting Pole with the Flag Mount Housing option. The part number for the Mounting Pole to use in conjunction with the square analog clock is as follows:

- Sapling Flag Mount Pole, Standard length: SAB-1BD-00S-0
- Sapling Flag Mount Pole, Short length: SAB-1GD-01S-0

Round Analog Clock

For a Flag Mount application, the 12" or 16" round analog clock uses the round analog clock double mount housing, which can be adapted into Flag Mount housing. The double mount housing consists of the Mounting Pole and two mounting rings. For a Flag Mount installation, the user will simply remove one of the two mounting rings. The part number for the double mount housing that can be adapted to Flag Mount Housing to use in conjunction with a round analog clock is as follows:

- For 12" Metal Analog Clocks:
  SAB-1BD-12R-0M
- For 16" Metal Analog Clocks:
  SAB-4BD-16R-0M
- For 12" SlimLine or Brushed Aluminum Analog Clocks:
  SAH-1BD-12R-0
- For 16" SlimLine or Brushed Aluminum Analog Clocks:
  SAH-1BD-16R-0

Large Digital Clocks

When used in a flag mount application, Sapling's large digital clocks (6.0", 9.0", or 12.0" digits) require a specific Mounting Pole depending on the size of the clock and whether the pole will be mounted to the ceiling or the wall. For ordering information, please contact your dedicated Sapling representative.
