# SAPLING

# PRAYER CLOCK

# Sapling Prayer Clock

## DESCRIPTION

The Sapling Prayer Clock is a professional, network-based synchronized clock system consisting of multiple clocks. The top clock is an analog square clock displaying local time, while the digital clocks below display the times for each prayer.

Advanced technology provides the top analog clock with accurate local time while also providing the needed daily corrections for the digital clocks. This accounts for the changing prayer times, depending on the position of the sun and geography (location).

Once powered and connected to the network, the Prayer Clock will communicate with pre-programmed Time Servers via the facility's internet connection to get the accurate time and the daily corrections of the everchanging prayer times.

All of these state-of-the-art, high-tech features are wrapped in stylish housing installed on the wall for maximum visibility and an eye-catching appearance.

*Specialty Dial Style G*

# Sapling Prayer Clock Advantages

-  **High-Quality, Professional Synchronized Prayer Clock** - Automatically adjusted for local & prayer times (after initial setup)
-  **Powering Options** - Locally powered at 110-230 VAC
-  **Network-Based Interface** - Available in either Wi-Fi or hard-wired network cable options
-  **Customized Printed Label** - For the preferred city (or location) name of the square analog clock
-  **Square Analog Clock Built-in Web Interface** - To easily configure the time zone offset, allowing the square clock to display local time depending on its geographical location (city)
-  **Digital Prayer Displays' Built-in Web Interface** - To easily configure various settings, such as displaying the prayers in either a 12-hour or 24-hour format, setting the displays' brightness, etc.
-  **Various Dial and Hand Styles** - The square analog clock is available in a variety of different dial and hand style options
-  **Synchronized Clock System** - The Prayer Clock may also interface with a facility-wide Sapling synchronized clock system

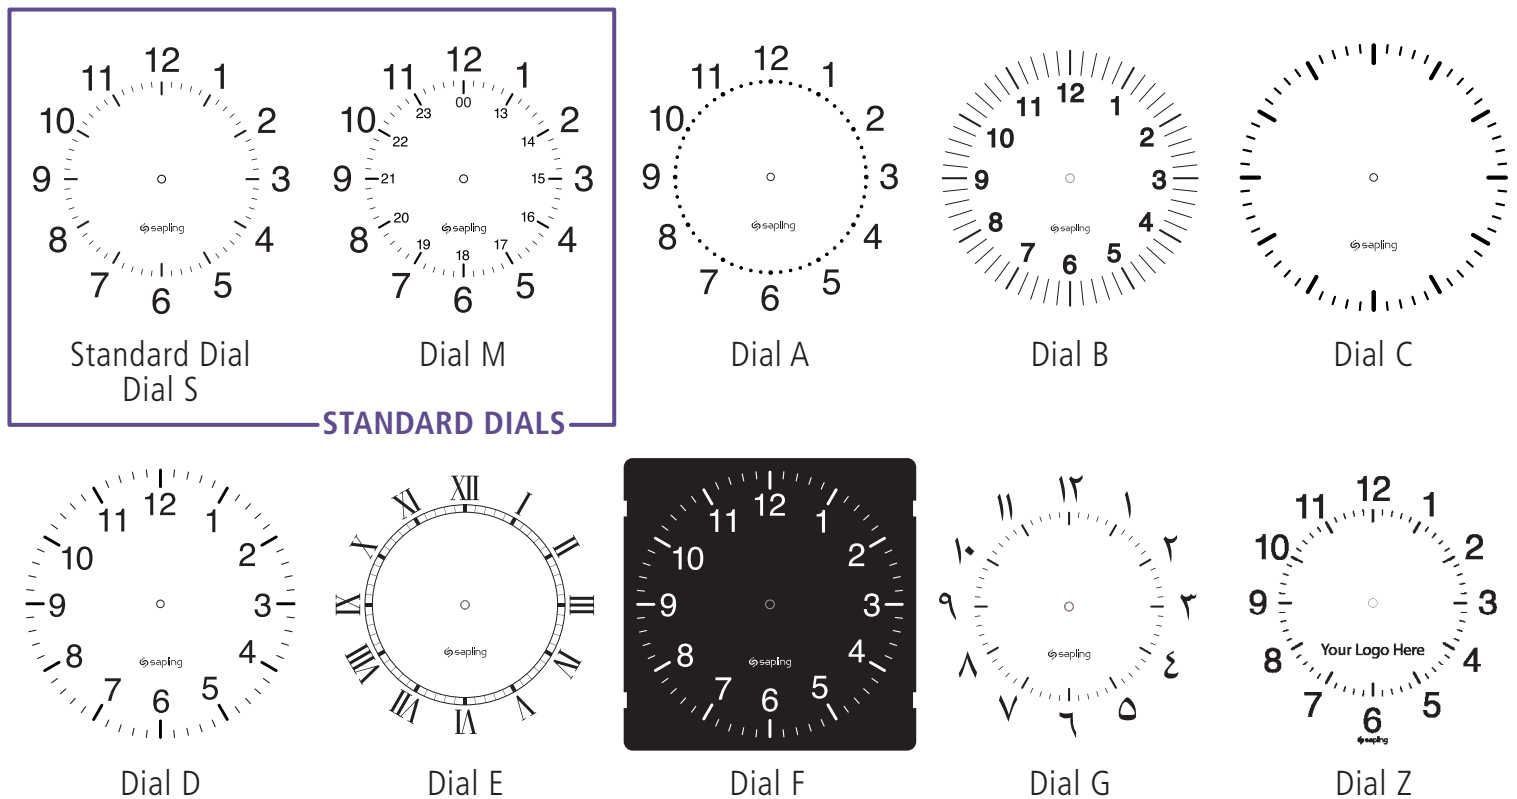

The Sapling Prayer Clock is the perfect stylish, professional solution to automatically calculate and correctly display the daily changing prayer times for each day of the year. It can also interface with a Sapling synchronized clock system. This way, synchronized clocks can be installed throughout the facility to maximize time awareness.

The Sapling synchronized clocks are offered in different sizes, shapes, displays (analog or digital), and many other design options to choose from, allowing an elegant solution, matching the facility's style.
