

Pre-Scheduled Countdown Master Clock Upgrade Feature (V2.3)

Features:

- The Pre-Scheduled Countdown master clock upgrade feature allows the user to program the master clock to command all secondary digital clocks in the system to preform a pre-scheduled countdown.
- Programming the countdown per user preference is easily done by using the master clock’s built-in web interface or its front keypad.
- The master clock Pre-Scheduled Countdown Feature is compatible with a 2-Wire, Wireless, TalkBack Wireless, and Wireless Messaging clock system (not compatible with IP-PoE and Wi-Fi clock systems).
- Flexible applications: Count down between class periods, lunch breaks, shift changes, and more!
- Compatible with SMA 3000, SMA 6000, NTP 8000 with at least 4 programmable relays, or the SMM master clock.
