

Temperature Sensor for Digital Clocks - V1.3

Features:

- Wired Directly to any Sapling 3200 or 3300 Digital Clock
- Allows clock to display temperature in Fahrenheit or Celsius
- Sensor packaged in a small, inconspicuous, water resistant compartment

Specifications:

Dimensions:

Length = 1.6" (4cm)

Width = 1.6" (4cm)

Depth = 0.6" (1.5cm)

Sensing Temperature:

-67°F - 200°F

-55°C - 93°C

Operating Temperature:

-67°F - 200°F

-55°C - 93°C

Accuracy:

±1.8°F (±1°C)

Power:

Powered by the Digital Clock

Ordering Information:

SBD-TEMP-000-0 / SLD-TEMP-000-0

(indoor rated) / (outdoor rated)
